

Inspire!

1. Be true to yourself. What is your WHY?

Try to do things that you really enjoy yourself. If you do things based on your passion, it doesn't matter how much effort you have to make. It's your passion and that gives you energy. So... follow it! Do ask yourself what you like best. Follow that path and it will give the least resistance.

2. Share !

Share your passion and your knowledge with as many people as possible.

3. Ensure trust and give confidence

Bring a spirit of encouragement, praise and serenity even in the midst of all chaos. Convey a strong message of companionship.

Learning GT is facilitation rather than dictate. Focus on strengths, not on deficits.

"People may forget what you said, but they will never forget how you made them feel."

4. Work together

Work together. Work along side each other to make things happen.
(two of the most inspiring words are "we" and "together")

5. Be positive

Stand FOR something! Do not be a leaf that blows with the wind, but take a position. People like to follow people who are in favour of something.

6. Speak to the imagination

Make future images, let us now your dreams. Paint a bold picture that helps visualize unlimited possibilities

"If you want to build a ship, don't call men together to collect wood, divide the work and give orders. Instead, learn them to long for the vast endless sea." (Antoine de Saint-Exupéry)

7. Open your door and your heart

Really connect with others. A king on a throne is ruler. A king between people is powerful. Be open to stories, tell your own story. Not only your successes but especially your failures and how you dealt with them.
